High-Gloss, Solvent-Free & Tintable Topcoating for Protection Against Corrosion and Weathering

BELZONA®
5115

Belzona 5115 is a two-component, high-gloss, and solvent-free top coating designed for the long-term protection of metallic and non-metallic surfaces against weathering, corrosion, and chemical attack.

This coating can be both brush- and spray-applied in a single coat, aiding rapid applications over small and large areas. In addition, Belzona 5115 provides exterior gloss and color retention while achieving a seamless and aesthetically pleasing finish.

This low-VOC coating can be tinted to achieve any desired industrial finish colors, as sometimes required by customers' specifications.

Other features of Belzona 5115 include scratch and impact resistance.

Features	Benefits
High Gloss	Unchanged external pleasant appearance during environmental exposure
Solvent-Free & Low-VOC Content	Less health and safety concerns during application
Sprayability	Easy applications onto large areas allowing quick return to service
Tintability	Achievement of various industrial finish colors, as required by specification work
Great mechanical adhesion onto various substrates with minimum surface preparation	Use on metallic and non-metallic substrates without need for specialized surface preparation equipment, resulting in reduced application times
Single-coat application	Economic application with quick return to servic
FDA-Direct Food Contact Approval	Applications onto equipment subject to direct food contact
